

Advance Care Planning Free Community Workshop for Patients with Metastatic Breast Cancer Being Treated at BCRC-WA

Workshop details:

When: Tuesday 25th June 10am - 2pm

Where: Cancer Council WA Seminar Room, Upstairs, Milroy Lodge

A light lunch will be provided.

Event Information

Over 80% per cent of Australians think it is important to put our end-of-life care treatment preferences into writing, but less than 5% of us have completed an advance care plan.

Palliative Care WA Advance Care Planning Workshop will help you to plan ahead so your loved ones and health care providers know what you would want if they could no longer speak for themselves.

Who should attend?

This workshop is for patients with metastatic breast cancer being treated at the Breast Cancer Research Centre-WA.

What is covered?

- What is Advance Care Planning?
- How to have a conversation about your end-of-life wishes with your family, loved ones and health care providers
- Exploring your values and what you want at end of life
- What is palliative care and when should it be offered?
- Organ and Tissue Donation
- How to make an Advance Health Directive, Enduring Powers of Guardianship and Attorney.

What attendees say about our Advance Care Planning workshops?

99% of participants have said our workshops have been useful or very useful with 76% participants rating them as "very useful". 98% of participants would recommend the PCWA workshops to family and friends.

Participant's comments:

Everything was useful – informative, interesting and humorous!

"Thank you for the great information - so informative, well presented and free!"

"Definitely recommend to friends and family"

"Overall excellent, information was comprehensive. I got what I needed"

"What I need to do to ensure I am happy with my future"
